

**SARVAJANIK COLEGE OF ENGINEERING  
AND TECHNOLOGY  
COMPUTER ENGINEERING DEPARTMENT**

**LAB ASSIGNMENT**

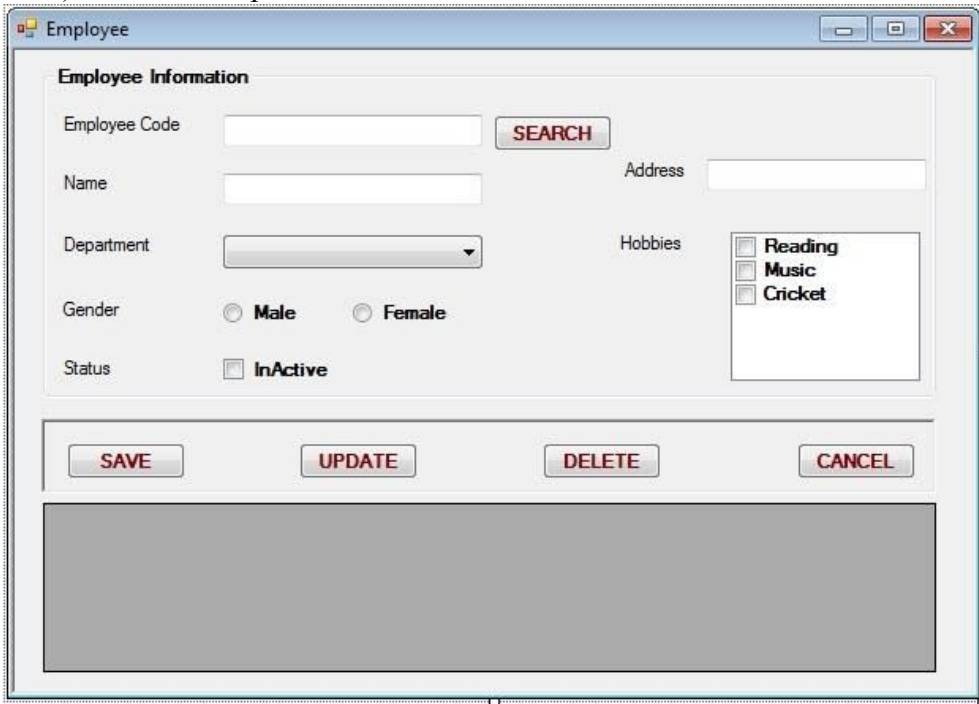

**SUBJECT NAME:** .NET Technology (2160711)

**YEAR:** B.E. – III (VI<sup>th</sup> SEMESTER)

| Sr. No                              | Practical List   | No. of Hours |
|-------------------------------------|--|--------------|
| <b>PART -1 Console Applications</b> |  |              |
| 1.                                  | <p><b>Write a program by using Console applications (Use ReadLine() &amp; WriteLine() functions):</b><br/> WAP to enter Employee Name, Age, Joining Date, BASIC, DA, HRA, PF, calculate Gross pay &amp; Net Pay and display it with Employee information.<br/> Take DA= 110% of Basic, HRA=20% of Basic, PF=12% of Basic<br/> Gross pay=Basic + DA+HRA<br/> Net pay=Gross pay – PF</p> | 2            |
| 2.                                  | <ul style="list-style-type: none"> <li>Write C# menu based program to do the following</li> <li>Convert binary to decimal</li> <li>Convert decimal to hexadecimal</li> <li>Convert decimal to binary</li> <li>Convert decimal to octal.</li> </ul> <p>Create a separate class for each functionality and put each class in a separate namespace in the same program.</p>               |              |
| 3.                                  | <p>Create console applications to implement following C# Concepts.</p> <ul style="list-style-type: none"> <li>Constructor &amp; Destructor</li> <li>Method Overloading</li> <li>Inheritance</li> <li>Operator Overloading</li> </ul>   | 2            |
| 4.                                  | Create a class to demonstrate static property by counting the number of objects created.   |              |
| 5.                                  | Create a class MyStringIndexer with data member's title, author, and subject. It should contain - Constructor with arguments - Indexer with string index Create a class IndexerDemo for Main function. Write code to get and set values of any data members of MyStringIndexer class.  | 2            |
| <b>PART -2 Windows Forms</b>        |  |              |
| 1.                                  | Create a Windows Form to Convert following currency conversion. Rupees to dollar, frank, euro.   | 2            |
| 2.                                  | Create a Windows Form to convert infix notation to postfix notation. Ex: a+b-c => ab+c   |              |
| 3.                                  | Create a Windows Form to convert digits to words Ex: 123 => One Hundred and Twenty-three   |              |

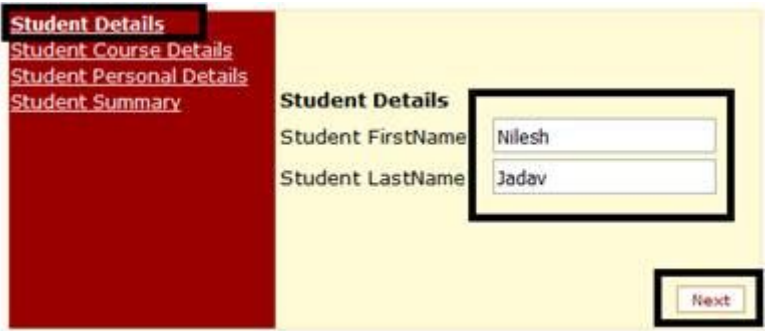

|    |  |   |
|----|--|---|
| 4. | Create a Windows Form to implement Calculator Application  |   |
| 5. | Create a windows form which implements Menus (File, Color). File menu item has 4 options Font, Open, Save, Print (Print Preview and Print), Exit. Color menu item has 3 options Red, Green, Blue and a ColorDialog . Clicking on the file menu items opens the respective dialog boxes and implements the functionality. Clicking on the colors sets the background of the form with respective color. Also provide a Context Menu of your choice. | 2 |
| 6. | Create a custom control for calculating Simple Interest and Compound Interest.   | 2 |
| 7. | Implement Paint application to draw various shapes using GDI+. Use menu to provide various options. Free Hand Drawing should also be implemented.  |   |

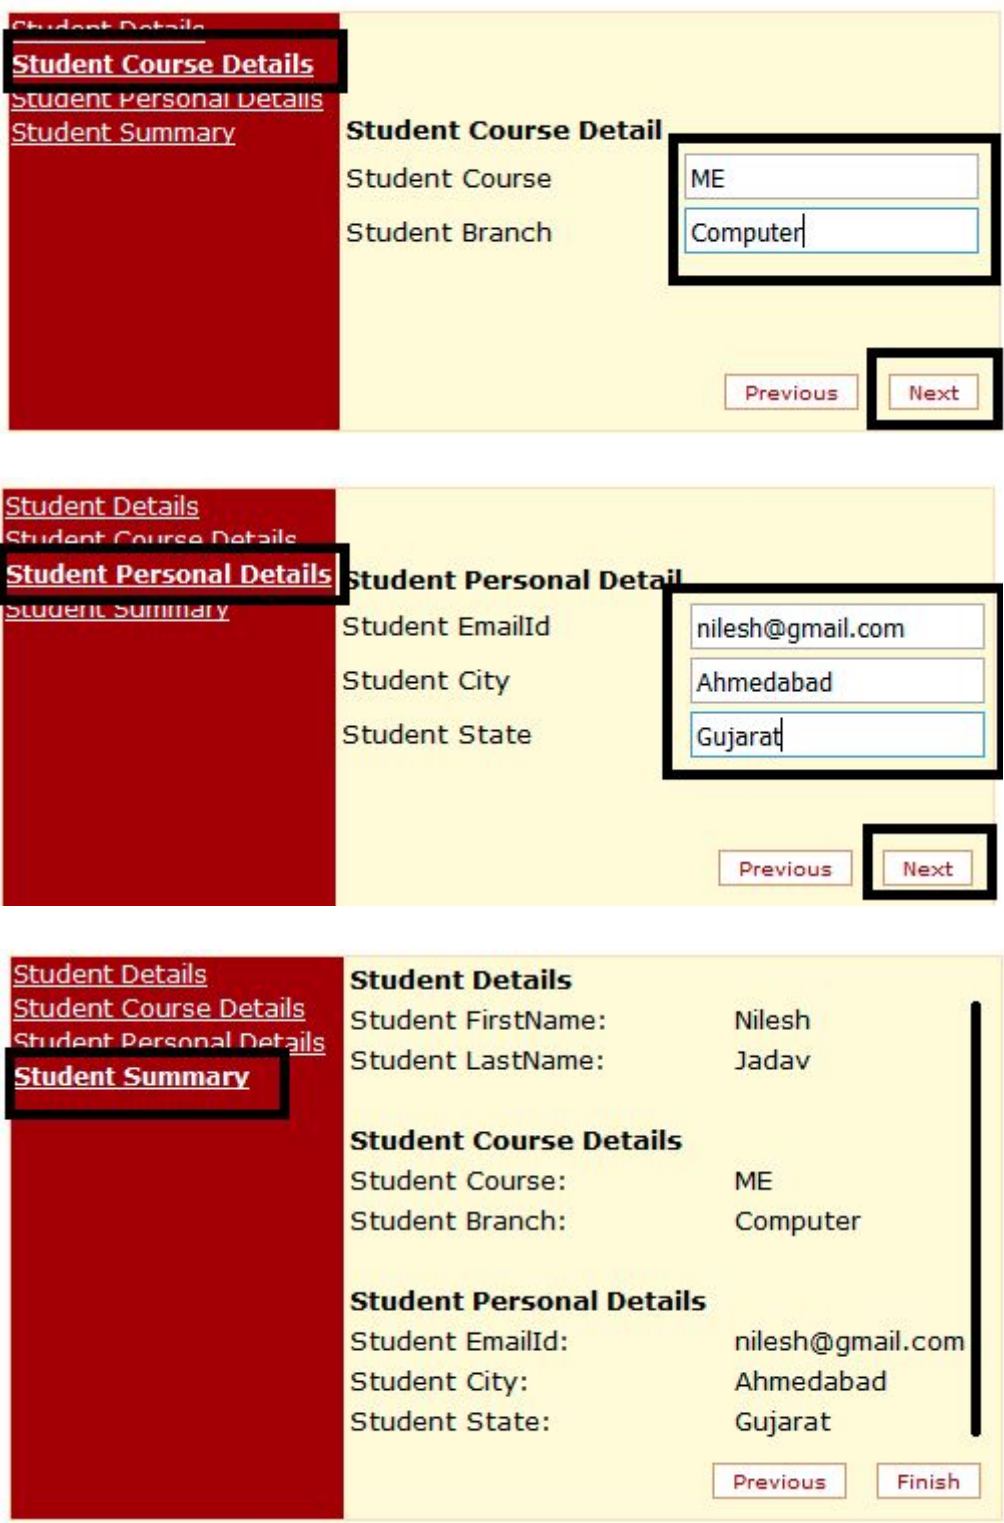

### PART -3 ADO.NET

|    |   |   |
|----|---|---|
| 1. | <p>Implement an MDI form to implement “Employee Management System”. When application runs it shows Splash screen, followed by Login Form.<br/>Use Progress Bar control to show progress of Login and then open MDI form<br/>MDI form should contain the following Forms</p> <ol style="list-style-type: none"> <li>1) employee master</li> <li>2) department master</li> <li>3) salary generator</li> <li>4) salary report (month wise and employee wise)</li> <li>5) Exit menu option</li> </ol>  | 2 |
|----|---|---|

### PART -4 ASP.NET

|    |  |   |
|----|--|---|
| 1. | Write a program to check whether empty query string is entered in Asp .net                             | 2 |
| 2. | Write a program to change color of Label text control programmatically in Asp .Net                     |   |
| 3. | Write a program to Enable-Disable Textbox and change the width of TextBox programmatically in Asp .Net |   |
| 4. | Design an application using Master Pages using Menu Controls.  | 2 |

|    |   |   |
|----|---|---|
|    |   |   |
| 5. | <p>Implement a Login Module in ASP.NET with C# with sql server database connectivity</p> <p>It Contains</p> <ul style="list-style-type: none"> <li>• Registration</li> <li>• Login</li> <li>• Change Password</li> <li>• Forgot Password</li> </ul> <p>In this use concepts of State management like cookies, session , query string and perform necessary validations. Also include the concepts of master page.</p> | 2 |
| 6. | Create a Website that display Advertisement using Adrotator control.  |   |
| 7. | <p>Write down code for how data can be displayed in following data bound controls</p> <ul style="list-style-type: none"> <li>• DataList</li> <li>• GridView</li> <li>• ListView</li> <li>• Repeater</li> </ul>  | 2 |
| 8. | <p>Implement the page with Wizard control in ASP.NET</p>    | 2 |

|    |  |   |
|----|--|---|
|    |   |   |
| 9. | <p>Create an application for XML Web service for</p> <ol style="list-style-type: none"> <li>conversion of Temperature from Fahrenheit to Celsius and vice versa.</li> <li>Simple Interest Calculator.</li> </ol> | 2 |
